How to run the Figma Prototype

1. Use the prototype link to launch the prototype

https://www.figma.com/proto/Jo3xUo2jSWubkAjeJB01DE/HCI-Project?node-id=15-1048&t=R2wEC5AuSVWkaH4o-1

Use the Toggle Buttons to navigate.

2. Use the design project link to launch the prototype

https://www.figma.com/design/Jo3xUo2jSWubkAjeJB01DE/HCI-Project?node-id=15-1048&t=R2wEC5AuSVWkaH4o-1

There is a play button on the top right to run the prototype on the design page.

Once you open the prototype(Iphone Screen) there will be a DMV app icon on the left bottom, click on it to begin.

I have given public "view" access to both Design and Prototype Links/Pages, I have tested it with Incognito mode, Just incase you face any privacy error accessing the link kindly email me for quick resolution.

Thank You
